

MINI-SPLIT ELECTRIC HEAT PUMP

Residents who have an EPA certified wood stove that participated in our program or who's wood stove is fewer than 10 years old may qualify for an additional mini split electric heat pump. We offer this to residents who are affected by the wood smoke curtailment program issued by Portola city ordinance 359.

Our goal is to provide an alternative device to run in tandem with the wood stove to help reduce heavy wood smoke during early morning and late evening inversions. Please call the district for more information or visit our website to find the Zone 1-A application.
