Project Description: Replacement of off road "roller"

Project would consist of replacing our existing old (1969) roller with a new or newer EPA compliant diesel engine roller. (See below) this would reduce Emissions first and foremost and also help our small business to contribute to our local economy. Our existing roller has been placed on low use to reduce emissions and rental equipment is used instead. Which is an added expense to our Company and to our customers. Our number one objective is to help reduce emissions in our local area and comply with regulations.

Existing Roller:

1969 Case  
1969 model year engine  
Hatz 34 HP

Replacement Roller:

2017 Sakai  
Engine : Kobota v3307@73 HP

Scope of work:

1. Order new or newer "roller"
2. Remove existing "roller"

McGarr Excavation, Inc.  
5941 County Road A-15  
P O Box 883  
Portola , Ca 96122  
Lic # 746805

**Project Organization/Background:**

McGarr Excavation began conducting business in 1996. We operate in Plumas, Nevada and Sierra Counties. Our reputation for Quality work has grown our small business into what it is today: four full time field employees, one part time field employee and two part time office employees that handle all the accounting, certified payroll, job cost tracking and more. McGarr Excavation completes most equipment repairs in house and will outsource all other items to our dealer or our local mechanics. We are doing our best to reduce emissions, in the past 6 years, two new heavy duty trucks were added to our business and our older (non compliant) truck was taken out of service. This project Funding from AB 2766 DMV would allow us to once again keep up with emission reduction and help our local economy by providing us the opportunity to hire, and also at minimum be more efficient for our existing customers.
