**Agenda Description:** Green Waste Alternatives in Plumas and Sierra Counties

**Issues:**

The open burning of green waste in residential properties can cause significant emissions of smoke when not burned properly. Over many years, the Air District has worked cooperatively with homeowner groups, private and public land owners, waste management businesses, biomass facilities and local public agencies to provide lower emission alternatives to the open burning of green waste in individual residential burn piles.

Staff has been researching sources of possible subsidies to promote using available alternatives to burning green waste. These will be discussed.

Additionally, the attached memo discussing green waste disposal in Plumas and Sierra counties was last updated in January 2018. Staff will discuss some of the major modifications currently in the works.
